SUMMARY

Program and Product Manager embedded at a Fortune 50 technology company, taking infrastructure and data platforms from discovery through launch, including 3 platform launches in a single quarter. Authored PRDs and led product discovery while building AI-native automation systems adopted across the organization.

WORK EXPERIENCE

Deloitte Jan 2024 - Present

Consultant, AI & Engineering

Fortune 50 Technology Company (embedded via Deloitte) | Program & Product Manager | Infrastructure & Operations | Mar 2025 - Present

- Product discovery & PRD:** Authored 45-page PRD for an internal roadmapping tool defining automated intake, roadmap health scoring, and synthesis-to-presentation features; mapped 50+ stakeholder journeys, prototyped in Figma, led user testing, and delivered a documented build-team handoff, cutting manual reporting 50%.
- Greenfield platform:** Stood up a cross-functional program and launched its MVP in under 3 weeks from conception, replacing spreadsheet workflows as source-of-truth for 200+ stakeholders; scaled post-launch into a unified site-selection platform for MW delivery.
- AI product discovery:** Defined requirements for an internal AI assistant spanning dual-agent validation, LLM-powered metric search, and analytics-agent integration; launched a centralized metrics experience, cutting engineering support 80%, reporting prep 30%, and metric-management clicks 70%.
- Enterprise financial platform:** Owned integration roadmap, releases, and documentation for a 7-module financial-management platform tracking \$20B+ in spend across a 20-person team; shipped 475+ features, ran a defect bash cutting open bugs 75%, and covered the client program manager through a 90-day absence.
- Operations program leadership:** Built net-new Scrum and intake process for a data-science organization, supporting 43 roadmap projects and closing 450+ tasks; launched 10+ dashboards across 35+ data centers; consolidated team syncs, saving ~10 hours weekly.
- Executive reporting:** Co-led migration of a 7-page VP-level executive dashboard to a modern platform with full feature parity and automated user cutover; absorbed managerial transitions with zero stakeholder disruption.
- AI workflow automation:** Designed and shipped personal and team-facing AI automation systems saving ~10 hours weekly, running multi-agent orchestration and scheduled jobs across 30+ data sources; published a user guide adopted by 25+ PMs and engineers.

Fortune 50 Technology Company (embedded via Deloitte) | GenAI Privacy Program Manager | Nov 2024 - Jan 2025

- Led workstream with 3 client privacy managers facilitating roadmap reviews across 140+ GenAI product releases; synthesized risk trends and briefed 40+ product managers, legal, and policy stakeholders, aligning on roadmap and mitigation.

Fortune 500 Cybersecurity, Healthcare & Entertainment Clients (via Deloitte) | PMO Analyst | 2024

- Scoped \$10M+ market opportunity across customer-partner and outcomes programs; supported \$2M ERP MVP across user stories, RAID log, and status reporting; documented supplier scope for a Medicare divestiture.

EDUCATION

University of California, Irvine - BA, Business Administration 2023

Emphases: Information Systems & Organization and Management | GPA: 3.93 | Dean's Honor Roll - All Quarters

CERTIFICATIONS

AWS Certified Cloud & AI Practitioner | GCP Certified GenAI Leader | Anthropic Claude 101 & AI Fluency

SKILLS

Product: Product strategy, PRD authoring, product discovery, user research & testing, roadmap planning, MVP scoping, feature prioritization, OKRs, go-to-market, requirements gathering

Program: Scrum/Agile, sprint planning, milestone tracking, launch execution, cross-functional stakeholder management, risk management

AI & Automation: Claude Code (multi-agent orchestration, custom skill development), enterprise AI agent platforms, NotebookLM, LLM-based workflow automation, prompt engineering, AI adoption strategy

Tools: JIRA, Smartsheet, Figma, Google Suite, Microsoft Suite, SAP, Workday Adaptive

Domain: Data center infrastructure, site selection, metrics reporting, executive dashboards, ERP/supply chain, GenAI privacy
